The 15-Minute Resume Tailoring Checklist

Tailor any resume to any job posting in 15 minutes, without lying and without starting over.

Step 1: Decode the posting (3 min)

- ☐ Mark must-haves: anything under Requirements or with 'required', 'must', 'minimum'.
- ☐ Mark nice-to-haves: Preferred, Bonus, 'a plus'.
- ☐ Circle phrases used 2+ times. Repetition shows what the hiring manager cares about.
- ☐ Paste the posting and your resume into the free TailorScan scanner and copy the missing keywords.

Step 2: Match the title and summary (2 min)

- ☐ Put the posting's job title in your headline or summary (never change a past job title).
- ☐ Rewrite your summary's first sentence to mirror the top two must-haves.

Step 3: Close the keyword gaps (5 min)

- ☐ For each missing keyword you truly have: add it to Skills using the posting's exact spelling.
- ☐ Work it into one bullet that proves you used it, ideally in your most recent role.
- ☐ Skip keywords you don't have. Never hide keywords in white text.

Step 4: Reorder for relevance (3 min)

- ☐ Move bullets that prove must-haves to the top of each role.
- ☐ Cut bullets that prove nothing this posting asks for.

Step 5: Re-scan and ship (2 min)

- ☐ Re-scan: aim for 75+ on roles you fit.
- ☐ At least 40% of bullets have a number. No 'responsible for'.
- ☐ Save as Firstname-Lastname-Company-Role.pdf and log it in your tracker.

The bullet formula

Strong verb + **what you did, with which tool** + **measurable result**.

Example: Cut onboarding time 30% (10 days to 7) by rebuilding the welcome flow in Braze.

ATS-safe formatting in 30 seconds

- One column. No tables, text boxes, icons, or skill bars.
- Standard headings: Summary, Experience, Education, Skills.
- Contact info in the body, not the Word header or footer.
- Export a text-based PDF. If you can select the text, an ATS can read it.

Want the full system? The Job Search Kit adds 3 ATS-safe resume templates, the full Tailoring Playbook (160 verbs and before-and-after rewrites), an application tracker that schedules your follow-ups, outreach and negotiation scripts, and 25 screening answer frameworks.
